Depok, Jawa Barat

Enthusiastic and motivated undergraduate Computer Engineering student at Universitas Indonesia, seeking to leverage my expertise in programming, devops, cloud computing, to develop innovative software solutions. A fast learner and easily adaptable to new environments, I am passionate about exploring the intersection of technology and societal impact. Eager to contribute my skills to a forward-thinking team where I can continuously learn and grow.

Education Level

Universitas Indonesia - Jl. Margonda Raya, Pondok Cina, Beji, Kota Depok, Jawa Barat, 16424 Aug 2021 - Jul 2025 (Expected)

Bachelor of Computer Engineering, 3.82/4.00

- Learning various fields such as basic programming, advanced programming, basic digital system, digital system design, object oriented programming, electrical circuit, computer network and etc.

SMAN 2 Sukabumi - Jl. Karamat No.93, Karamat, Kec. Gunungpuyuh, Kota Sukabumi, Jawa Barat 43122 Aug 2018 - Jul 2021

High School Natural Science, 90.00/100.00

- Top 5 Parallel Ranking

Work Experiences

Traveloka - Tangerang Selatan, Banten, Indonesia Feb 2024 - Jun 2024

Software Engineer Android

Traveloka is the leading travel platform in Southeast Asia. Traveloka serves 20+ products that include comprehensive travel services. From transportations to accommodations, discovering nearby attractions, and insurance products to financial services.

- Architected and implemented Android applications using MVVPM and MVVM design patterns, improving separation of concerns and facilitating easier testing and maintenance.
- Applied Clean Architecture principles to create a clear separation of concerns, enhancing code quality and facilitating easier testing and maintenance.
- Developed comprehensive unit tests using JUnit and MockK achieving over 80% code coverage across 150+ classes, significantly enhancing code quality and maintainability.
- Implemented reactive programming paradigms using RxJava and coroutines, enhancing app responsiveness and data flow management.
- Optimized UI rendering by implementing ViewStub, resulting in a 40% reduction in ANR (Application Not Responding) incidents.

Badan Riset dan Inovasi Nasional RI - Tangerang Selatan, Indonesia Sep 2023 - Dec 2023

Backend Engineer

Badan Riset dan Inovasi Nasional (BRIN) is a non-ministerial government institution that is under and responsible to the President of Indonesia. BRIN is a government agency that carries out research, development, study and implementation, as well as integrated inventions and innovations.

- Developed the backend for an OCPP (Open Charge Point Protocol)-based electric vehicle charging station management system using Go Language.
- Designed and implemented a microservices architecture using Golang and gRPC, improving system performance by around 30% and increasing scalability to handle around 50% more concurrent requests.
- Optimized database queries by implementing indexing and caching, reducing query response time by 40% and improving overall application performance.
- Implemented RESTful APIs to facilitate seamless interaction between the web platform and backend services, ensuring reliable data flow and real-time updates with an uptime of 99.8%.

Network Laboratory, Universitas Indonesia - Depok, Indonesia Jul 2023 - Present

Laboratory Assistant

Network Laboratory is one of the laboratory in Univesity of Indonesia that study and work in network and application development.

- Collaborating with researchers and students to support ongoing network-related research projects
- Teach 100+ students in network-related majors, such as basic computer networks, object-oriented programming, database structure, and computer network design
- Mentoring and guiding more than 100 students, empowering them to become skilled professionals in the field of information technology.

Organisational Experience

Exercise FTUI - Depok, Indonesia

Feb 2023 - Jan 2024

Lead Software Developer Division

EXERCISE provides a forum for students in the Department of Electrical Engineering to learn about how professional companies work to achieve targets on similar project categories developed by this organization.

- Led and contribute in a team of 10+ members in the design, development, and deployment of a web-app from an external client.
- Led a team of 5+ staff members in the exercise project division in developing a full-stack web app using Next JS, Typescript, Tailwind CSS as the frontend, Express JS and MongoDB as the backend.
- Contribute and participate in all phases of the development life cycle including analysis, design, development, testing, and maintenance.
- Created and maintained the project roadmap, ensuring that development tasks were prioritized and delivered on time.

Exercise FTUI - Depok, Indonesia

Feb 2022 - Jan 2023

Software Developer

- Actively participated in Agile development methodologies, such as Scrum or Kanban, to facilitate effective project management and delivery.
- Resolved technical issues and bugs in a timely manner to ensure the stability and performance of the application.
- Contributed as a front-end developer developing Exercise's Website using React JS, Tailwind CSS, and Bootstrap.
- Contributed as a back-end developer developing back-end template code using Go language and PostgreSQL.

Ikatan Mahasiswa Elektro (IME) FT UI - Depok, Indonesia

Feb 2022 - Dec 2022

Staff of Rohani Islam Elektro

Ikatan Mahasiswa Elektro Fakultas Teknik Universitas Indonesia (IME FTUI) is an organization operating in the field of student affairs, aiming to facilitate and serve students of the Department of Electrical Engineering, Faculty of Engineering, University of Indonesia.

- Successfully managed and optimized the organization's budget, resulting in increased financial efficiency and resource utilization.
- Oversaw and managed the financial activities of Retro IME FTUI, ensuring adherence to budgetary guidelines and financial regulations.

Google Developer Student Club Universitas Indonesia - Depok, Indonesia

Oct 2021 - Dec 2022

Member

- Actively participated in organizing and leading workshops, seminars, and events to foster a collaborative learning environment within the GDSC community.

Skills, Achievements & Other Experience

- **Hard Skills:** Kotlin, Typescript, Golang, Java, C, and Python
- **Technologies:** Jetpack Compose, Next JS, PostgreSQL, MongoDB, Express JS, Nest JS, Spring Boot, Docker, gRPC
- **Projects** (2024): News App : A news app with Jetpack Compose, Clean Architecture, and MVVM, utilizing Dagger Hilt for dependency injection, and Coroutines for managing asynchronous tasks and reactive data streams.
- **Projects** 📌 (2023): Next Chat : Full-stack web application with seamless real time messaging feature using Pusher websocket, Next JS, Prisma ORM, and MongoDB
- **Projects** 📌 (2023): Next Thread : Dynamic social media application leveraging Next.js and Prisma to enhance user engagement and streamline functionality
- **Projects** 📌 (2023): Personal Portfolio : Personalized portfolio website showcasing my professional journey, projects, and skills.
- **Projects** 📌 (2023): UI ConNext : An innovative social media mobile app tailored specifically for University of Indonesia students, developed using React Native in conjunction with Express Js and MongoDB.
- **Modules Taken:** Web Development Bootcamp by Dr. Angela Yu
